

GST

The trump in grinding solutions

Cylindrical grinders for grinding crankshafts, transmission and cam shafts, as well as special grinders

GST – GRINDING MADE FOR YOU

Certified according to
ISO 9001
VDA 6.4

Transmission shaft grinding

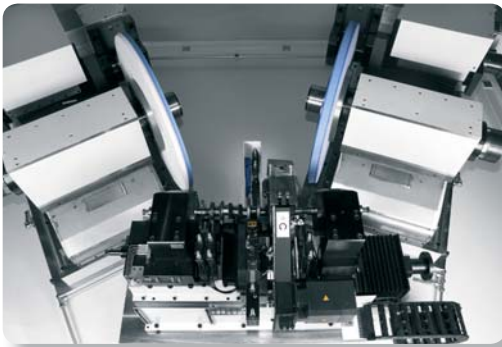

Angular and straight plunge-cut grinders
for grinding transmission shafts, suited for
part families and average productivity

Double-head cylindrical surface grinders
for the complete grinding of transmission
shafts (diameters, plane surfaces and grooves),
for highest productivity

Your notes:

Crankshaft grinding

Double-head cylindrical surface grinders for the simultaneous grinding of flanges and journals, for highest productivity

Double-head cylindrical surface and internal grinders for the simultaneous grinding of flanges and flange bores, for highest productivity

Oscillating grinders for grinding main bearing journals and pins

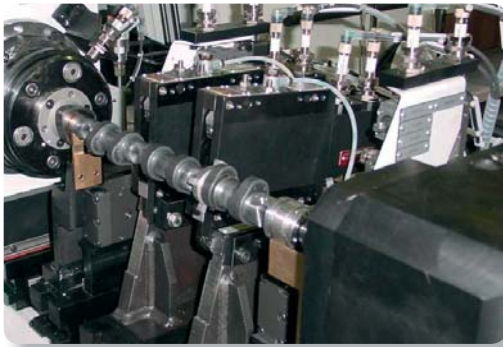

Multi-wheel grinders for the simultaneous grinding of main bearings, for highest productivity

Angular plunge-cut grinders for the grinding of flanges and journals, for average productivity

Camshaft grinding

Multi-wheel grinders for the simultaneous grinding of bearing seats, suited for part families and high productivity

Your notes:
